# 86. Crea tu propio archivo de configuración para el servicio del carrito

## Config\cart.php

```php
class CartService {
    protected $cookieName;
    protected $cookieExpiration;

        // No olvidemos nunca el error con las dos __
    public function __construct() {
        $this->cookieName = config('cart.cookie.name');
        $this->cookieExpiration = config('cart.cookie.expiration');
    }
    ...
    public function makeCookie(Cart $cart) {
        // Atributo con el nombre de la cookie (manejabilidad)
        return Cookie::make($this->cookieName, $cart->id, $this->cookieExpiration);
    }
...
```

## .env y .env.example

```
...
MIX_PUSHER_APP_CLUSTER="${PUSHER_APP_CLUSTER}"

CART_COOKIE_NAME = cart
```

## Pruebas

```
C:\Users\llemi\Desktop\Lunk\Laravel\ola>php artisan tinker
Psy Shell v0.11.8 (PHP 8.0.9 — cli) by Justin Hileman
>>> $service = resolve(App\Services\CartService::class)
⇒ App\Services\CartService {#4552}

>>> $cookie = $service->makeCookie(App\Models\Cart::find(1))
⇒ Symfony\Component\HttpFoundation\Cookie {#4558}

>>> $cookie->getName()
⇒ "cart"

>>> $cookie->getExpiresTime()
⇒ 1676579299

>>> date(DATE_ATOM, $cookie->getExpiresTime()
... )
⇒ "2023-02-16T20:28:19+00:00"
```
